

The Impossible Turn

If during takeoff your engine failed, would you be prepared to make important decisions? Should I turn back? What altitude do I need? Please attend this important seminar on how to survive an engine failure on takeoff, and if you can really make the impossible turn. We will look at examples of both successful and unsuccessful turns back to the field, in an effort to help you be better prepared in the unlikely event of an engine failure during takeoff. Come join us.

Directions: Please see map link for directions, seminar will be held in the Airport Conference Room.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
